Whenever you go to a concert of any kind of music, you expect to come away feeling taken out of yourself, uplifted or released emotionally. So, it's a surprise to discover that these unique, vague & deep emotions, which cannot be put into words, have been conveyed from the composer, via the performer, by means of an extremely detailed and specific written code; that of music theory.

The course "It Sounds Good in Theory" will help you realize the importance of this written language which has evolved to enable you to share the thrills of musical sounds. Studies will take you from Grades 2/3 upto Grade 5.

Peter Walden played oboe and cor anglais full time in CBSO for 36 years. He would like to pass on some of his professional experience to music lovers.
