

Information Release – Scheme Update

17 January 2011

Work starts on historic bridge

1. The main contractor, Volker Laser, commenced the setting up of the site offices during week commencing 10th January 2010
2. Temporary traffic signals will be installed for the first phase of the works from Monday 24th January which will last for approximately seven weeks. The signals will be in operation 7 days a week.

They will be manually controlled during the peak hours as follows:

Peak time manual control

07:00 – 10:00 am, and

15:30 – 18:30 pm

Further temporary traffic signals will be installed after the Easter break

3. The first phase of the work will include the erection of scaffolding, strengthening of the first sections and other concrete repairs, and painting
