

Young Parent

A mum attending the Children's Centre has been raising her three children aged between one and five years alone. This has not been without its difficulties but she has been accessing the Children's Centre for over two years and has found it to be an excellent source of support and information. During this time mum has been attending various training sessions at the Children's Centre including Behaviour Management, Healthy Cooking and Women's Health, facilitated by both the Children's Centre and Workers' Educational Association (WEA).

Mum also received support from a Learning Ambassador who is based at the Children's Centre. Attending these courses has given mum the confidence she needed to begin seeking employment. She has been attending the 'Choices' course run at the Children's Centre, which helps people look into their options for working with children. However, mum has already been successful in finding a job at a local company and her children attended the childcare setting at the Children's Centre
