

# CAREERS ACTIVITIES LINKED TO KEY INDUSTRY SECTORS

## AGRICULTURE CAREERS ACTIVITY (KS4)

Whether you know exactly what job you want to do and how to get there, or whether you aren't sure just yet, researching the job roles within different industry sectors will help you to expand your knowledge and help you understand the learning pathways, skills and qualifications which potential employers may be looking for from young people entering their industry sector.

During this activity you will be able to explore these different job roles, begin to look in more detail at specific job roles and then use labour market information to understand what type of employers you could end up working for.

As part of this series of careers activities you will be given the opportunity to explore the many careers that may be open to you should you wish to take up a role within the Agriculture industry sector.

### SECTION 1 WHAT IS AGRICULTURE?

Let's start by understanding exactly what is meant by Agriculture and how the industry has changed over the years. We will also explore the different job roles that are within this industry sector.

[Click here to watch this short video to take a very brief look at how the industry has changed over the years.](#)

You should be able to watch this video on your mobile phone or on your computer.

Having watched the video can you list 5 x different ways in which the industry has changed over the years?

#### Description of changes to the Agriculture Industry

## SECTION 2

# ROUTES INTO AGRICULTURE

[Visit this web page to help you understand the different entry routes you could take to join the AGRICULTURE sector.](#)

Lets us explore these routes in more details.

## THE TECHNICAL ROUTE

Known as Tech levels or T-levels, these include qualifications such as BTECs and NVQs in engineering, ICT, Agriculture & the built environment.

Vocational courses prepare you for a particular job, industry or sector. They are often very practical and may include coursework assignments related to real-work scenarios, as well as links with employers. Vocational courses are offered at different levels and can lead onto apprenticeships, higher education (university) and employment

**T-Levels in Agriculture, Land Management and Production are due to be introduced by colleges and training providers across the UK from September 2023.**

**Even though T-Level courses relating to the Agriculture Industry are not yet available please research and provide your answers in the Free Text Boxes below.**

1. Using the internet can you research and list 5 x job roles which you think might suit the TECHNICAL Entry route?

2. What do you think are the benefits of choosing the TECHNICAL ROUTE into Agriculture?

# THE APPRENTICESHIP ROUTE

Apprenticeships allow you to earn money, combining on-the-job training with study. They can open doors to a wide variety of Agriculture jobs and can be taken at different levels, including intermediate, higher and degree apprenticeships.

You will generally need a minimum of five GCSEs (or equivalent) including English, maths and science or technology subjects, often at grades 9 to 4 (A\* to C) due to competition for places.

**Research and answer the following questions about the APPRENTICESHIP route into Agriculture.**

1. Visit [this Website](#) to explore the options open to you if you choose to follow the Apprenticeship route.

2. Using the internet can you research and list some companies in Worcestershire that offer Agriculture Apprenticeships?

3. What do you think are the benefits of choosing the APPRENTICESHIP ROUTE into Agriculture?

# THE UNIVERSITY ROUTE

After completing your A-Levels, T-levels, IB, Highers, BTEC Level 3 or equivalent, you may decide to go on to study a subject relating to Agriculture at university.

Students would usually complete a university course over a period of three to four years. Depending on the subject, these courses combine coursework, exams and practical learning also. It is possible to study your degree part time and in your private time. Students would normally focus on one course which would support their entry into a specific job role.

You normally need to have studied maths, English and Science or a related vocational course to Level 3, in order to apply to Agriculture degrees at university

**Research and answer the following questions about the **UNIVERSITY** route into Agriculture.**

1. Using [this website](#) you explore and list the different Agriculture courses you could study at University?

2. Can you list 5 x job roles which you could undertake once you have completed an Agriculture related degree at university?

1	<input type="text"/>
2	<input type="text"/>
3	<input type="text"/>
4	<input type="text"/>
5	<input type="text"/>

3. Using the internet can you research and list some local, regional and nationally based universities where you could study Agriculture related degrees?

## SECTION 2

[Why not watch this short video about other careers in Agriculture which use Science?](#)

# VETERINARY SURGEON

1. How many hours per week would you expect to work as a VETERINARY SURGEON?

2. Can you name the qualifications which might help you become a VETERINARY SURGEON?

3. What would the starting salary be for a qualified VETERINARY SURGEON?

4. Can you write a paragraph about the tasks you might be required to undertake as a VETERINARY SURGEON?

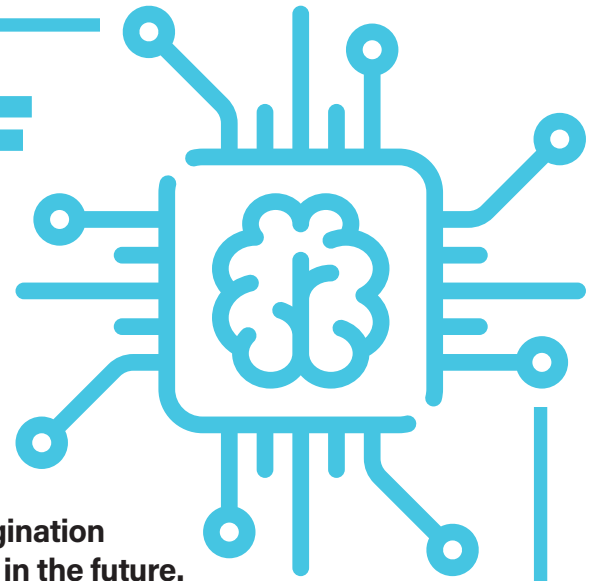

5. Can you list 3 x employers in Worcestershire where you could be employed as a VETERINARY SURGEON?

[Why not watch this short video about Laura who is a Large Animal Veterinarian?](#)

# THE FUTURE OF AGRICULTURE

**You should now have a better understanding of the Agriculture Industry and some of the roles you could choose if you wanted to enter this sector.**

**Your next task will be to look to the future and use your imagination to look at how the Agriculture Industry sector could change in the future.**

**Can you think of some ways in which the Agriculture Sector could change in the future?**

In the free text box below list some of your ideas.

Think about ALL the different things that might change as Agriculture, Science and Technology becomes more advanced and the impact this could have on the industry.

**Now watch this short video to see if your ideas are like those featured within the video**

Now you have had a glimpse of the future can you write a few paragraphs on how technology and the use of science will change the way we farm in the future?

If you are feeling artistic why not create an example drawing of what some of your idea/s may look like?

Here are some questions which might help you come up with some ideas.

Perhaps think about giving examples of how we might operate farm machinery in the future?

How could technology support us to overcome this?

What will change in the way we shop for food?

How will this food be delivered to retailers?

How will weather in the future change how we grow crops?

Will artificial intelligence have an impact on farming in the future?

What jobs could be replaced by technology?
