

## Appendix 18: Analysis of aggregate resources in ECA 18: Carrant Brook Corridor

### ECA Summary for the Fourth Stage consultation on MLP (Winter 2018):

#### Sand and gravel

There are 18 resource areas identified for sand and gravel in Carrant Brook Corridor ECA:

- Key: 1
- Significant: 7
- Not significant: 1
- Compromised: 9

#### Crushed rock

There are no resource areas identified in Carrant Brook Corridor ECA for crushed rock.

#### Non-aggregates

BGS data indicates that there are no non-aggregate mineral deposits in Carrant Brook Corridor ECA.

## Overview of resource assessment for ECA 18

### Sand and gravel resource areas:

Resource number*	Second Stage Consultation		Third Stage Consultation		Fourth Stage Consultation		
	Original estimated resource tonnage (2 tonnes/m <sup>3</sup> )	Significance	Revised estimate of resource tonnage (1.65 tonnes/m <sup>3</sup> )	Significance	New resource number (where resource has been split)	Revised estimate of resource tonnage (1.65 tonnes/m <sup>3</sup> )	Result
18/1	960,000	Significant	792,000	Significant	18/1	742,500	Significant
					18/1b		Compromised
18/2	Depth unknown	Not significant	Depth unknown	Not significant	Not reassessed		
18/3	1,596,000	Significant	1,316,700	Significant		1,316,700	Significant
18/4	7,232,000	Key	5,966,400	Key	18/4	5,966,400	Key
					18/4b		Compromised

18/9a	700,000	Compromised	577,500	Compromised	Not reassessed		
18/10	1,140,000	Significant	940,500	Significant			Compromised

<b>Overview</b>	
<b>Resource number:</b>	18/1
<b>Resource name:</b>	South of Beckford
<b>Resource area:</b>	16 ha
<b>Resource depth:</b>	Estimated 6m
<b>Location</b>	
<b>OS sheet reference:</b>	SO 93 NE
<b>National grid ref:</b>	398139, 235414
<p>The map displays the resource area 18/1 in green, situated south of Beckford. It is bounded by the Carrant Brook to the north and east. Surrounding areas include 18/9 (orange), 18/2 (light orange), and OUT (grey). A legend in the bottom right corner defines the colors: orange for 'Compromised', light orange for 'Not Significant', grey for 'Out of County', and green for 'Significant'. The map also shows local features like 'Little Beckford', 'Wardleaze', and 'Carrant Brook'. Text in the top right corner of the map area reads: '© Crown copyright and database rights 2018 Ordnance Survey 100024230. Derived from 1:50,000 scale BGS Digital Data under Licence 2001/125. Amended British Geological Survey © NERC'.</p>	
<b>Resource description:</b>	
<b>Resource description:</b>	<p>This resource area is comprised of a small area of 1<sup>st</sup> river terrace sand and gravel alongside a larger area of 2<sup>nd</sup> terrace Wasperton sand and gravel.</p> <p>The 2<sup>nd</sup> terrace deposit was derived by solifluction from the inferior oolite of Bredon Hill, re-sorted at this lower level by fluvial action. The mapped boundary between the 2<sup>nd</sup> terrace (Wasperton) and the fan gravel to the north (not included as a resource area) is somewhat arbitrary. The deposit generally consists of Jurassic limestone fragments with some rounded ironstone fragments and occasional bunter quartzite and flint pebbles in a matrix of medium-grained well-rounded sand. BGS memoirs record that the 2<sup>nd</sup> terrace differs in character depending on whether they occur in the valleys of the Avon, the Carrant Brook or the Washbourne Brook.</p> <p>The 2<sup>nd</sup> terrace in the deposits to the north has previously been worked at a number of sites. The planning application for Carrant Brook Pit (to the north west of this resource area) stated that the site would be worked to 6m depth. The 2<sup>nd</sup> terrace has also been worked to the north of this area, on a site which is now a Silk Mill. No information on depth is available for the Silk Mill area.</p> <p>(Estimated resource depth based on Carrant Brook Pit: 6m)</p>
<b>Assessment of resource for the second consultation on MLP (Autumn 2013)</b>	
<b>Commentary:</b>	Small resource area intersected by roads with small-scale ribbon development. This deposit extends into Gloucestershire (labelled OUT on the figure), this is not considered as a resource area in Worcestershire.
<b>Crude estimate of</b>	Area: 16ha x average depth: 6 m / 2

<b>resource:</b>	Estimated resource volume: 480,000 m <sup>3</sup> <b>Estimated resource tonnage (at 2 t/m<sup>3</sup>): 960,000</b>		
<b>Conclusion:</b>	Significant. Consider in defining areas of search.		
<b>Assessment of resource for the Third Stage consultation on MLP (Spring 2015)</b>			
<b>Revised estimate of resource:</b>	Area: 16ha x average depth: 6 m / 2 Estimated resource volume: 480,000 m <sup>3</sup> <b>Estimated resource tonnage (at 1.65 t/m<sup>3</sup>): 792,000 tonnes</b>		
<b>Conclusion:</b>	Significant.		
<b>Assessment of resource for the Fourth Stage consultation on MLP (August 2018)</b>			
This resource area has been split into areas 18/1 and 18/1b.			
<b>Resource area 18/1</b>		<b>Resource area 18/1b</b>	
<b>Resource area:</b>	15 ha	<b>Commentary:</b>	Screened out due to the following appendix A criterion: - Area of Outstanding Natural Beauty
<b>Resource depth:</b>	Estimated 6m		
<b>Revised estimate of resource:</b>	Area: 15 ha x average depth: 6m ÷ 2 Estimated resource volume: 450,000 m <sup>3</sup> <b>Estimated resource tonnage (at 1.65 t/m<sup>3</sup>): 742,500 tonnes</b>		
<b>Conclusion:</b>	Significant resource	<b>Conclusion:</b>	Compromised

<b>Overview</b>	
<b>Resource number:</b>	18/2
<b>Resource name:</b>	North of Little Beckford
<b>Resource area:</b>	10 ha
<b>Resource depth:</b>	Not known
<b>Location</b>	
<b>OS sheet reference:</b>	SO 93 NE
<b>National grid ref:</b>	397415, 235353
<b>Resource description:</b>	
<b>Resource description:</b>	1 <sup>st</sup> river terrace sand and gravel. No exposures. None of the workings in this area have worked the 1 <sup>st</sup> river terrace deposits.
<b>Assessment of resource for the second consultation on MLP (Autumn 2013)</b>	
<b>Commentary:</b>	Small deposit intersected by a road and small-scale development in the east of the resource area.
<b>Crude estimate of resource:</b>	Depth not known.
<b>Conclusion:</b>	Not significant: Small deposit with no information to estimate the resource in this area. Not for consideration in defining areas of search.
<b>Assessment of resource for the Third Stage consultation on MLP (Spring 2015)</b>	
<b>Revised estimate of resource:</b>	No change to the assessment.
<b>Conclusion:</b>	Not significant.
<b>Assessment of resource for the Fourth Stage consultation on MLP (August 2018)</b>	
Not reassessed due to resource not being classified as Key or Significant in the Third Stage Consultation	

<b>Overview</b>	
<b>Resource number:</b>	18/3
<b>Resource name:</b>	South of the Carrant Brook
<b>Resource area:</b>	42 ha
<b>Resource depth:</b>	Estimated 3.8m
<b>Location</b>	
<b>OS sheet reference:</b>	SO 93 SE
<b>National grid ref:</b>	396671, 234953
<b>Resource description:</b>	
<b>Resource description:</b>	2 <sup>nd</sup> terrace (Wasperton) sand and gravel.
<p>The 2<sup>nd</sup> terrace deposit was derived by solifluction from the inferior oolite of Bredon Hill, re-sorted at this lower level by fluvial action. The mapped boundary between the 2<sup>nd</sup> terrace (Wasperton) and the fan gravel to the north (not included as a resource area) is somewhat arbitrary. The deposit generally consists of Jurassic limestone fragments with some rounded ironstone fragments and occasional bunter quartzite and flint pebbles in a matrix of medium-grained well-rounded sand. BGS memoirs record that the 2<sup>nd</sup> terrace differs in character depending on whether they occur in the valleys of the Avon, the Carrant Brook or the Washbourne Brook.</p> <p>The 2<sup>nd</sup> terrace in the deposits to the north has previously been worked at a number of sites. The planning application for Carrant Brook Pit (to the north of this resource area) stated that the site would be worked to 6m depth. The 2<sup>nd</sup> terrace has also been worked to the north west of this area, at Aston Mill, where thickness averaged around 1.5m.</p> <p>(Estimated resource depth based on Carrant Brook Pit: 6m + Aston Mill: 1.5m / 2 = 3.8m)</p>	
<b>Assessment of resource for the second consultation on MLP (Autumn 2013)</b>	
<b>Commentary:</b>	Small resource area with a road but no built development in the resource area. This deposit extends into Gloucestershire (labelled OUT on the figure), this is not considered as a resource area in Worcestershire.
<b>Crude estimate of resource:</b>	Area: 42 ha x average depth: 3.8 m / 2 Estimated resource volume: 798,000 m <sup>3</sup>

	<b>Estimated resource tonnage (at 2 t/m<sup>3</sup>):1,596,000</b>
<b>Conclusion:</b>	Significant. Consider in defining areas of search.
<b>Assessment of resource for the Third Stage consultation on MLP (Spring 2015)</b>	
<b>Revised estimate of resource:</b>	Area: 42 ha x average depth: 3.8 m / 2 Estimated resource volume: 798,000 m <sup>3</sup> <b>Estimated resource tonnage (at 1.65 t/m<sup>3</sup>): 1,316,700 tonnes</b>
<b>Conclusion:</b>	Significant.
<b>Assessment of resource for the Fourth Stage consultation on MLP (August 2018)</b>	
<b>Resource area:</b>	42 ha
<b>Resource depth:</b>	Estimated 3.8m
<b>Revised estimate of resource:</b>	Area: 42 ha x average depth: 3.8 ÷ 2 Estimated resource volume: 798,000m <sup>3</sup> <b>Estimated resource tonnage (at 1.65 t/m<sup>3</sup>): 1,316,700 tonnes</b>
<b>Conclusion:</b>	Significant resource

<b>Overview</b>		
<b>Resource number:</b>	18/4	
<b>Resource name:</b>	Bredon to Beckford	
<b>Resource area:</b>	226 ha	
<b>Resource depth:</b>	Estimated 3.2m	
<b>Location</b>		
<b>OS sheet reference:</b>	SO 93 NW, SO 93 NE	
<b>National grid ref:</b>	394048, 235907	

<b>Resource description:</b>	
<b>Resource description:</b>	<p>2nd terrace (Wasperton) sand and gravel.</p> <p>The 2nd terrace deposit was derived by solifluction from the inferior oolite of Bredon Hill, re-sorted at this lower level by fluvial action. The mapped boundary between the 2nd terrace (Wasperton) and the fan gravel to the north (not included as a resource area) is somewhat arbitrary. The deposit generally consists of Jurassic limestone fragments with some rounded ironstone fragments and occasional bunter quartzite and flint pebbles in a matrix of medium-grained well-rounded sand. BGS memoirs record that the 2<sup>nd</sup> terrace differs in character depending on whether they occur in the valleys of the Avon, the Carrant Brook or the Washbourne Brook. On the north side of the Carrant Brook valley, sandy gravels predominantly of limestone pebbles, "merit further investigation as to their thickness and quality".</p> <p>The 2<sup>nd</sup> terrace deposit has previously been worked at a number of sites:</p> <ul style="list-style-type: none"> <li>• Working took place in the Aston Mill pit (to the east of this resource area). Thickness averaged around 1.5m but this thickness is not maintained further west towards Kinsham with increasing distance from the gravel source.</li> <li>• A planning application for Carrant Brook Pit (beyond Aston Mill to the east of this resource area) stated that the site would be worked to 6m depth.</li> <li>• The 2<sup>nd</sup> terrace has also been worked to further east of this area, on a site which is now a Silk Mill. No information on depth is available for the Silk Mill area.</li> <li>• Working at Kemerton Pit (to the north west of the resource area) showed 4.5m of sand and gravel</li> </ul>

- overlain by 0.5m of sandy loam.
- An old gravel pit immediately to the north showed 2.1m of sand and gravel overlain by 0.9m of loam.

In the western end of this resource area, immediately south west of Bredon, the memoir records that the thickness probably does not exceed 2m.

(Estimated resource depth based on mean average of: a) Aston Mill Pit: 1.5m b) Carrant Brook Pit: 6m c) Kemerton Pit 4.5m d) pit to the north: 2.1m e) memoir: 2m = 3.2m )

**Assessment of resource for the second consultation on MLP (Autumn 2013)**

**Commentary:** A large resource area intersected by roads with some ribbon development. The deposit has been extensively worked and these areas are not included as part of the resource area. The deposit continues to the east beyond the former Aston Mill pit, and this is considered as separate resource areas (18/10, 18/11 and 18/12) as the areas are separated by over 500m.

**Crude estimate of resource:** Area: 226ha x average depth: 3.2 m / 2  
Estimated resource: 3,616,000 m<sup>3</sup>.  
**Estimated resource tonnage (at 2 t/m<sup>3</sup>): 7,232,000 tonnes**

**Conclusion:** Significant – key resource.  
Use to define areas of search.

**Assessment of resource for the Third Stage consultation on MLP (Spring 2015)**

**Revised estimate of resource:** Area: 226ha x average depth: 3.2 m / 2  
Estimated resource: 3,616,000 m<sup>3</sup>.  
**Estimated resource tonnage (at 1.65 t/m<sup>3</sup>): 5,966,400 tonnes**

**Conclusion:** Significant – key resource.

**Assessment of resource for the Fourth Stage consultation on MLP (August 2018)**

This resource area has been split into areas 18/4 and 18/4b.

<b>Resource area 18/4</b>		<b>Resource area 18/4b</b>

<b>Conclusion:</b>	Compromised by development.
<b>Assessment of resource for the Fourth Stage consultation on MLP (August 2018)</b>	
Not reassessed due to resource not being classified as Key or Significant in the Third Stage Consultation	

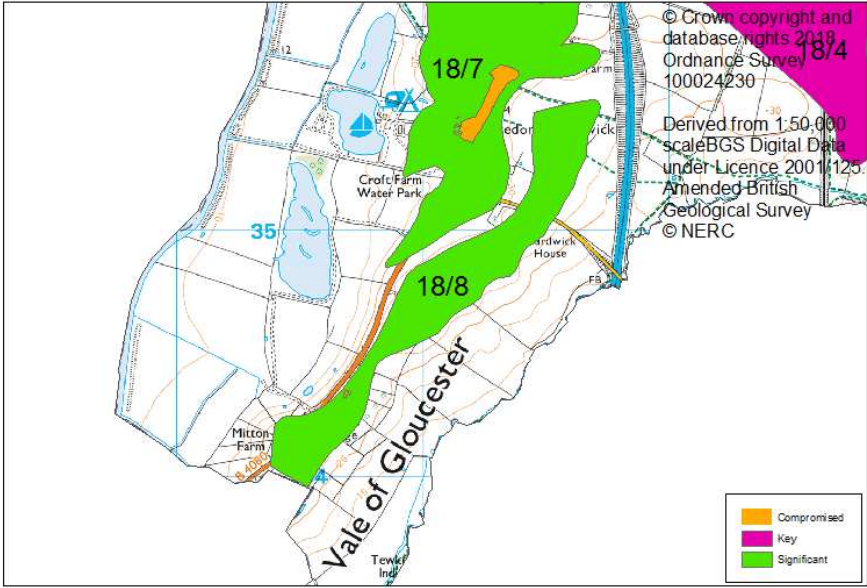

<b>Overview</b>	
<b>Resource number:</b>	18/6
<b>Resource name:</b>	Bredon Church Street
<b>Resource area:</b>	15 ha
<b>Resource depth:</b>	Estimated 2m
<b>Location</b>	
<b>OS sheet reference:</b>	SO 93 NW
<b>National grid ref:</b>	392061, 236930
<b>Resource description:</b>	
<b>Resource description:</b>	2 <sup>nd</sup> terrace (Wasperton) and 3 <sup>rd</sup> terrace (New Inn) sand and gravel. The BGS memoirs record no clear data regarding thickness of the 2 <sup>nd</sup> terrace in this location. The memoirs state that 3 <sup>rd</sup> terrace thickness is not likely to be more than 2m. (Estimated resource depth based depth on 2m)
<b>Assessment of resource for the second consultation on MLP (Autumn 2013)</b>	
<b>Commentary:</b>	A small deposit, over half of which is compromised by the village of Bredon, less than 10ha remains uncompromised.
<b>Crude estimate of resource:</b>	Area: 15 ha x average depth: 2m x 0.5 Estimated resource volume: 150,000m <sup>3</sup> <b>Estimated resource tonnage (at 2 t/m<sup>3</sup>): 300,000 tonnes.</b>
<b>Conclusion:</b>	Compromised by development. Not for consideration in defining areas of search.
<b>Assessment of resource for the Third Stage consultation on MLP (Spring 2015)</b>	
<b>Revised estimate of resource:</b>	Area: 15 ha x average depth: 2m x 0.5 Estimated resource volume: 150,000m <sup>3</sup> <b>Estimated resource tonnage (at 1.65 t/m<sup>3</sup>): 247,500 tonnes</b>
<b>Conclusion:</b>	Compromised by development.
<b>Assessment of resource for the Fourth Stage consultation on MLP (August 2018)</b>	

Not reassessed due to resource not being classified as Key or Significant in the Third Stage Consultation

<b>Overview</b>		
<b>Resource number:</b>	18/7	
<b>Resource name:</b>	Bredon's Hardwick North	
<b>Resource area:</b>	55 ha	
<b>Resource depth:</b>	Estimated 2.3m	
<b>Location</b>		
<b>OS sheet reference:</b>	SO 93 NW	
<b>National grid ref:</b>	391231, 235656	
<b>Resource description:</b>		
<p><b>Resource description:</b> 2<sup>nd</sup> terrace (Wasperton) and 3<sup>rd</sup> terrace (New Inn) sand and gravel.</p> <p>BGS memoirs record that the 2<sup>nd</sup> terrace differs in character depending on whether they occur in the valleys of the Avon, the Carrant Brook or the Washbourne Brook. On the north side of the Carrant Brook valley, sandy gravels predominantly of limestone pebbles, "merit further investigation as to their thickness and quality". The memoir reports that working has taken place south of Twyning Green but considerable areas likely to be over 2m in thickness remain. Between Bredon and Bredon's Hardwick the memoir records that soils suggest that sand is the dominant component. Bunter pebbles comprise most of the gravel portion but flints and a significant percentage (perhaps 10%) of Jurassic limestone pebbles are also present. The gravelly sands at and to the north of Bredon's Hardwick are estimated to be 2-3m thick on average, possibly reaching a maximum of 4m locally.</p> <p>For the 3<sup>rd</sup> terrace, approximately 2m depth is exposed in a road cutting at Bredon's Hardwick.</p> <p>The nearby working at Bredon's Hardwick worked the Avon 1<sup>st</sup> terrace.</p> <p>(Estimated resource depth based on: a) south of Twyning Green: 2m, b) Bredon's Hardwick median average of 2m, 3m and 4m = 3m, c) road cutting at Bredon's Hardwick: 2m = 2.3m)</p>		
<b>Assessment of resource for the second consultation on MLP (Autumn 2013)</b>		
<b>Commentary:</b>	A medium-sized deposit intersected by a road with scattered development.	

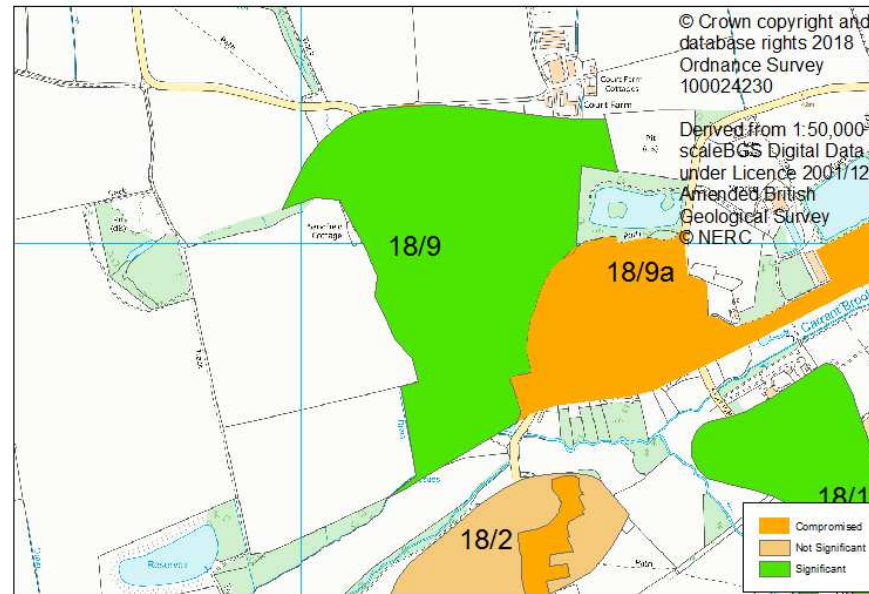

<b>Crude estimate of resource:</b>	Area: 55 ha x average depth: 2.3m x 0.5 Estimated resource volume: 632,500 m <sup>3</sup> <b>Estimated resource tonnage (at 2 t/m<sup>3</sup>): 1,265,000 tonnes.</b>		
<b>Conclusion:</b>	Significant. Consider in defining areas of search.		
<b>Assessment of resource for the Third Stage consultation on MLP (Spring 2015)</b>			
<b>Revised estimate of resource:</b>	Area: 55 ha x average depth: 2.3m x 0.5 Estimated resource volume: 632,500 m <sup>3</sup> <b>Estimated resource tonnage (at 1.65 t/m<sup>3</sup>): 1,043,625 tonnes</b>		
<b>Conclusion:</b>	Significant.

<b>National grid ref:</b>	397322, 235993

<b>Resource description:</b>	
<b>Resource description:</b>	2 <sup>nd</sup> terrace (Wasperton) and 4 <sup>th</sup> terrace sand and gravel.
	<p>The 2<sup>nd</sup> terrace deposit was derived by solifluction from the inferior oolite of Bredon Hill, re-sorted at this lower level by fluvial action. The mapped boundary between the 2nd terrace (Wasperton) and the fan gravel to the north (not included as a resource area) is somewhat arbitrary. The deposit generally consists of Jurassic limestone fragments with some rounded ironstone fragments and occasional bunter quartzite and flint pebbles in a matrix of medium-grained well-rounded sand.</p> <p>The 2<sup>nd</sup> terrace deposit has previously been worked at a number of sites. The planning application for Carrant</p>

<p>Brook Pit (to the west of this resource area) stated that the site would be worked to 6m depth. The 2<sup>nd</sup> terrace has also been worked in an area to the east of Beckford which is now a Silk Mill. No information on depth is available for the Silk Mill area.</p> <p>The 4<sup>th</sup> terrace deposit has been worked at Beckford Quarry and at an older site north of Beckford Quarry at Court Farm. The planning application for Beckford Quarry stated that the maximum depth of the resource was 4m, and 8 boreholes showed the depth of sand and gravel to range between 12' and 14' (3.66m-4.27m, median average = 3.97m).</p> <p>(Estimated resource depth based on mean average of a) 2<sup>nd</sup> terrace deposits at Carrant Brook Pit: 6m and b) Beckford Quarry: 3.97m = 5.0m)</p>																	
<b>Assessment of resource for the second consultation on MLP (Autumn 2013)</b>																	
<b>Commentary:</b>	A small deposit intersected by a road. The deposit has been extensively worked and these areas are not included as part of the resource area. The 2 <sup>nd</sup> terrace deposit continues to the west beyond the former Carrant Brook pit, and this is not considered as a resource area as there is less than 10ha remaining. The 2 <sup>nd</sup> terrace deposit also extends to the east, under the village of Beckford (18/9a) and beyond the previous workings (18/10).																
<b>Crude estimate of resource:</b>	Area: 27 ha x average depth: 5 m ÷ 2 Estimated resource volume: 675,000 m <sup>3</sup> <b>Estimated resource tonnage (at 2 t/m<sup>3</sup>): 1,350,000 tonnes</b>																
<b>Conclusion:</b>	Significant. Consider in defining areas of search.																
<b>Assessment of resource for the Third Stage consultation on MLP (Spring 2015)</b>																	
<b>Revised estimate of resource:</b>	Area: 27 ha x average depth: 5 m ÷ 2 Estimated resource volume: 675,000 m <sup>3</sup> <b>Estimated resource tonnage (at 1.65 t/m<sup>3</sup>): 1,113,750 tonnes</b>																
<b>Conclusion:</b>	Significant.																
<b>Assessment of resource for the Fourth Stage consultation on MLP (August 2018)</b>																	
This resource area has been split into areas 18/9 and 18/9b.

Overview	
Resource number:	18/9a
Resource name:	Beckford a)
Resource area:	14 ha
Resource depth:	Estimated 5m
Location	
OS sheet reference:	SO 93 NE
National grid ref:	397322, 235993

**Resource description:**

**Resource description:** 2<sup>nd</sup> terrace (Wasperton) and 4<sup>th</sup> terrace sand and gravel.

The 2<sup>nd</sup> terrace deposit was derived by solifluction from the inferior oolite of Bredon Hill, re-sorted at this lower level by fluvial action. The mapped boundary between the 2<sup>nd</sup> terrace (Wasperton) and the fan gravel to the north (not included as a resource area) is somewhat arbitrary. The deposit generally consists of Jurassic limestone fragments with some rounded ironstone fragments and occasional bunter quartzite and flint pebbles in a matrix of medium-grained well-rounded sand.

The 2<sup>nd</sup> terrace deposit has previously been worked at a number of sites. The planning application for Carrant Brook Pit (to the west of this resource area) stated that the site would be worked to 6m depth. The 2<sup>nd</sup> terrace has also been worked in an area to the east of Beckford which is now a Silk Mill. No information on depth is available for the Silk Mill area.

The 4<sup>th</sup> terrace deposit has been worked at Beckford Quarry and at an older site north of Beckford Quarry at Court Farm. The planning application for Beckford Quarry stated that the maximum depth of the resource was 4m, and 8 boreholes showed the depth of sand and gravel to range between 12' and 14' (3.66m-4.27m, median average = 3.97m).

(Estimated resource depth based on mean average of a) 2<sup>nd</sup> terrace deposits at Carrant Brook Pit: 6m and b) Beckford Quarry: (3.97m) = 5.0m)

<b>Assessment of resource for the second consultation on MLP (Autumn 2013)</b>	
<b>Commentary:</b>	A small deposit which is compromised by the village of Beckford. The 2 <sup>nd</sup> terrace deposit continues to the west (18/9) and to the east beyond the previous workings (18/10).
<b>Crude estimate of resource:</b>	Area: 14 ha x average depth: 5 m ÷ 2 Estimated resource volume: 350,000 m <sup>3</sup> <b>Estimated resource tonnage (at 2 t/m<sup>3</sup>): 700,000 tonnes</b>
<b>Conclusion:</b>	Compromised by development.
<b>Assessment of resource for the Third Stage consultation on MLP (Spring 2015)</b>	
<b>Revised estimate of resource:</b>	Area: 14 ha x average depth: 5 m ÷ 2 Estimated resource volume: 350,000 m <sup>3</sup> <b>Estimated resource tonnage (at 1.65 t/m<sup>3</sup>): 577,500 tonnes</b>
<b>Conclusion:</b>	Compromised by development.
<b>Assessment of resource for the Fourth Stage consultation on MLP (August 2018)</b>	
Not reassessed due to resource not being classified as Key or Significant in the Third Stage Consultation	

<b>Overview</b>	
<b>Resource number:</b>	18/10
<b>Resource name:</b>	East of Beckford
<b>Resource area:</b>	19ha
<b>Resource depth:</b>	Estimated 6m
<b>Location</b>	
<b>OS sheet reference:</b>	SO 93 NE
<b>National grid ref:</b>	398632, 236465
<b>Resource description:</b>	
<b>Resource description:</b>	<p>The 2<sup>nd</sup> terrace deposit was derived by solifluction from the inferior oolite of Bredon Hill, re-sorted at this lower level by fluvial action.
