Resource name:	Sheriff's Lench
Resource area:	235ha
Resource depth:	Estimated 6.1m
Location	
OS sheet reference:	SP 05 SW
National grid ref:	402059, 249325

Resource description:	<p>A deposit of fluvio-glacial sand and gravel caps the summit of the plateau around Sheriff's Lench. The deposit is composed mainly of reddish, brown sand with bunter pebbles and occasional flints. Thicknesses are difficult to estimate but it appears that about 6.1m of sand and gravel may be present in the immediate vicinity of Sheriff's Lench. Variation in thickness is suggested by the occurrence of Lias clay at depths of between 0.6m and 1.2m in several places, although the Lias clay may in fact be part of the gravel deposit.</p> <p>(Estimated resource depth based on 6.1m depth at Sheriff's Lench)</p>
