

Pershore Infrastructure Improvements: Wyre Road Active Travel Corridor

This planned component of a wider major scheme involves the provision of a separated, high quality active travel link along Wyre Road, which will link the large villages of Wyre Piddle and Pinvin to Pershore Secondary School, Pershore Station and the Keytec Business Park, with existing good quality onward connections to Pershore Town Centre and proposed onward connections to Evesham and westwards towards Worcestershire Parkway and Worcester. This scheme will also include a comprehensive waymarking investment and installation of permanent walking and cycling counters for ongoing monitoring.

This map shows where the proposed works for the Wyre Road Active Travel Corridor will be happening as described above.
