Effectiveness of the Policy

All staff receives a copy of the confidentiality policy and it is explained to them. This policy is available for the local authority and other agencies so that they know it exists and they understand it fully.

The policy is reviewed every 2 years.

Contacts and referrals are recorded on a stand-alone database. The database informs management of emerging themes, cohort ages and total numbers using the service.

Only anonymised statistical data will be used for monitoring service delivery and audit purposes.

Data will be extracted from time to time to meet various reporting requirements of the service both nationally, regionally and locally.
