

# Scale Measurements

**1.**

Read the recipe to ensure you know the volume of ingredients you need.

**2.**

Ensure the scales are set to 0 before you weigh, match up the volume measurement grams=G ounce =Oz

**3.**

Match the ingredients to the recipe and pour into the scales

**4.**

Fill the scale bowl until the measuring needle moves to the number listed on the recipe.  
If it is a digital scale, you are looking for numbers on a screen.
