

My name is Wendy Patrick and I am a concerned resident of Wolverley writing to you to voice my concerns for the proposed quarry.

I have reservations as the roads around Wolverley and Cookley are not wide enough to suitably sustain all the traffic we have now and all the extra lorries that will come with the quarry. On the A491 that goes from Hagley to junction 4 on the m5 there is a quarry all winter it is thick with mud all summer it is dusty and that is a road that is bigger and wider and more suitable to use so what would the roads look like around here?

Also, the children find it really hard to cross for school at the new park gate housing estate they have already launched a complaint and it has gone into the local paper, if this is happening now then what would it be like when the quarry starts with all the extra lorries it is just an accident waiting to happen!!!!!!!!!!!!!!

Further to my previous e-mail outlined below

We have recently had road closures and traffic light system in place on the Wolverley road and this has caused chaos and has heightened my concerns with the lorries that will be coming and going I think will cause the same impact to the traffic.

Also its all well and good saying that they will return the land to the way it is, but what will happen to the wildlife in the meantime? This will be in 10 years time which is no good to the bee's and hedgehogs that thrive on that land that are currently at risk in the UK,

No matter how they decide to fluff up what they will do in the future we are all about what's happening now so in our opinion this is not good enough and does not answer any of the issues the local residents have in the area. There is no possible way this will work for the benefit of anyone living in the area and the only one set to gain is the farmer with no consideration for the wildlife and the impact on the local community.

We are strongly opposed against the proposed plans for the quarry at Lea Castle farm.

The reasons being as follows

It will be situated on historical parkland which link the villages of Wolverley and Cookley.

Potential exposure to harmful mineral dust.

Large increase in HGV traffic, increasing pollution and leaving large quantities of mud on the road which could prove dangerous when wet.

With a number of schools in the vicinity it could prove dangerous to the children.

Removal or damage to protected trees.

Potential disruption and economical impact on local business as they have already suffered and still are because of Covid.

10 years of constant noise and pollution.

Mr and Mrs P Patrick  
38 Hayes Road  
Wolverley
