About these statistics

1. The Claimant Count includes all Universal Credit claimants who are required to seek work and be available for work, as well as all Jobseeker's Allowance (JSA) claimants. Under Universal Credit a broader span of claimants are required to look for work than under JSA.
2. The Universal Credit Full Service is now fully rolled in most areas of the UK for the majority of **new** claims. The pilot programme to accommodate existing tax credit and other legacy benefit claimants (those claiming housing benefit, income support, income-related Jobseeker's Allowance and income related employment and support allowance) was begun in July 2019 but was suspended due to pandemic. The pilot programme recommenced in May 2022.
3. Claimant count rates or proportions express the number of claimants in an area/group as a percentage of the mid-2020 resident population in that area/group.
4. Individual figures are rounded to the nearest 5, and as a result may not sum to the rounded totals.
5. The claimant count data is calculated on a monthly basis and is released in the first half of the following month. The data release shows the provisional figures for the latest full month's data and revised figures for the previous month. For example: the data release for August would show provisional claimant count figures for July and revised figures for June.
6. All data has been downloaded from [NOMIS](#). Links to other economic indicators can be found on the [Information on the Worcestershire Economy page](#) on the Worcestershire County Council website.
