

How can I be involved?

What are we doing?

Building together is our new coproduction strategy to improve your services and a way of working together

It can be working together on almost anything from an EasyRead leaflet to designing a new service.

The main point is that people who use services are the best at knowing what they want.

This can include professionals, carers and families as well.

By working together as equals the things people think are important will be included.

How will this happen?

We will have two groups who will work together:

Building Together Board  
Peer Support Network

What is the Building Together Board?

Ten people with lots of different skills who use services and/or carers working with Worcestershire County Council

Together we will produce a Charter, Shared Values and a plan to deliver services

People who use services know what works, so we can't get it right without you

What will I need to do?

Attend Board two-to-three-hour meetings six times a year

Board members will be paid £25.38 per hour

Work together for people who use services, what they want and be fully involved in helping to make it happen.

Help create a regular Newsletter

We will make sure everyone will have the right support to be involved

Feel valued, see different points of view and have fun!
