

Create an email

Your young person is completing Passport to Digital. They have been learning all about the digital sector and developing their knowledge and skills around online safety, keeping their personal information safe and using digital devices.

To support your young person with their learning and to allow them to practice the skills they have been learning, you may like to support them by helping them create an email account.

Where able, encourage them to complete the online registration form independently, under your supervision. You can also share your expectations and how you expect them to use their email safely.

Here are a few examples of email providers you may like to choose from:

Gmail

Outlook

iCloud

Yahoo

Chosen email provider:
