

Subject: Objection to Lea Castle Farm Quarry Proposal

I am writing to express my strong objection to the proposed quarry development at Lea Castle Farm by NRS Aggregates. This development poses serious threats to our local environment, community, and economy.

Key concerns include:

* Environmental Damage:

- * Increased air and noise pollution
- * Water pollution and habitat destruction

* Community Disruption:

- * Increased traffic congestion and safety risks
- * Loss of valuable green space and visual intrusion

* Economic Impact:

- * Negative impact on tourism and property values

It is particularly concerning that NRS Aggregates has not adequately addressed the significant residential concerns raised regarding this proposal. This lack of consideration for the community's well-being is unacceptable.

I urge you to carefully consider the significant negative impacts of this proposed quarry and reject this harmful development.

Thank you for your time and attention to this matter.

Sincerely

Julianne priest

Lea Castle village resident
