

Hello,

After objecting before i now want to submit another objection to this proposed Quarry near to where i live.

I have lived in Cookley village for 10 years now and although my husband has ill health at least we can walk or drive to enjoy the surrounding wonderful countryside that we live near.

We have noticed in those years how seriously bad the traffic is on the Wolverhampton road and through either Wolverley or Broadwaters, if roadworks are in effect this holds up the now congested traffic even further.?! As well as the extra lorries that will be on the roads in this area causing fumes and queues, We are concerned about the air quality AND the fact that the extraction of the land will take over 10 years??!!

This is GREEN farming land and once this is gone how can it be put back to how it was? All the natural habitats of wild animals, birds, insects and plants will be disrupted for the future, and in the meantime the surrounding area and its inhabitants will have to cope with noise, dangerous dust and the stress of trying to get to hospital or doctor appointments with hold ups on the roads which can not cope as it is with extra traffic also from New residents on the Lea Castle site off the Wolverhampton road.

I worry for the children getting to schools and their health and well being. They will lose so much not being able to walk through the Bridleway with scenic views that help them learn about nature. I DO HOPE that this Quarry is NOT approved.

Yours Sincerely

Mrs Jo Metcalf
