

I have on several occasions requested official published accounts from NRS and its subsidiaries to prove proof that local and extended government are on the take with this project and although requested and within public domain this company and our MP are loven to supply. so there are major questions on how many "back handlers" have been given on this project in the last 10 years!

p I have raised this and several issues but no one seems to accept Kidderminster is fast becoming an extended town, there is currently a plan to add 800 hundred homes to Lea Castle, although the original 600 are not complete at present, this work and a quarry is totally unsustainable by the local environment and would render the village of Cookley unliveable.

The traffic is already unsustainable and with additional lorries and fumes this would be one unliveable by anyone - would you live in the middle of it.? Two - dangerous for anyone walking on footpaths.

At the end of the day Kidderminster is being extended by Wyre Forest District Council in all directions and Cookley is a Major target. WE DO NOT want a quarry or a building site or a golf club we WANT FIELDS, TREES, FRESH AIR and take your sand quarry to OXFORDSHIRE to your home - I am sure as hell this would never have got to this stage in the rural belt populated by government from Westminster,,,,,,and see how you feel when it is on your doorstep.

I am going to fight for ALL in government MP's MUST live in their constituency that way we all may get proper representation and support in future.ours lives in Malvern what the bloody hell does he know
