

Stop Lea Castle Quarry,

After listening to the ambiguous replies given to some of the very important questions asked by various residents of Cookley, Wolverley, Franche areas of Kidderminster, along with various other presentations but forward at the current ongoing enquiry I am more than ever convinced that the application should be refused - the health of various residents, and particularly children of the future who would have to live with the reduction in air quality caused by, not only the extraction of gravel etc., but the additional health risks caused by numerous HGV vehicles spewing out diesel fumes adding to the problem of air quality and the danger these lorries would add to already narrow footpaths does not appear to have been taken into account , or answered, by the applicants but simply brushed under the carpet as it were.

Roderick Shaw
