

I am formally objecting to the proposed Lea Castle Quarry for a lot of reasons

1. Pollution- This will have a bad effect on people health living , working and schooling near the area as your aware there are a number of school near the area and will very young children in the long run this will cause health issues. People with Asthma will find it will effect their life breathing issues and more hospital admissions will occur.
2. Traffic and congestion issues this will cause problems getting in and out of cookley as we have already got lorry's from the near by steal works .With the extra housing in lea castle going on at the moment this will a lot of extra traffic in the area also accidents at the top of cookley as previous caused a few deaths.
3. Environment- think about the impact on the wildlife and people with their horses etc and business that will no longer be able to run . Homes will be ruined with Noise and pollution .

I've lived in cookley all my life 56 years and this will ruin the village with the Noise and dust . How would you like it on your door step? The owner is just greedy and doesn't even live in the village that's why he isn't bothered . This village has spent alot of their own time and earnt money and fund raised on this don't let it happen for a Greedy man.

4. HOW CAN IT KEEP BEING REJECTED ON MORE THAN ONE OCCASION AND THEY KEEP GETTING THE CHANCE TO TRY AGAIN. Unfair

Thankyou Mr Edwin Billingsley
Cookley resident
