Giovanna

Quarry speech:

Here at Heathfield Knoll we have a friendly and welcoming school that values the environment a great deal.

We are home to 100's of species of plants and animals and share our beautiful site with badgers, foxes, roe deer and the rare tawny owl.

We are deeply proud of our green site.

In 2023 we were finalists in the ISA, excellence in sustainability award.

We have recently bought the meadow next to our school to help protect the environment even more.

We have an Earth Center which has a polytunnel and growing space.

This year we have grown 100's of cucumbers and tomatoes and about 50 pumpkins ready for carving later in Autumn.

Now about the quarry, it will be very noisy and disturb lessons, it will ~~also~~ pollute our environment and create dangerous traffic around our school. My fellow students and I are against this happening.
