Scheme 6

Alternative Text Description:

This map shows a summary of the proposals for Scheme 6 of the A38 Bromsgrove Route Enhancement Programme. This scheme is located in Bromsgrove on Regents Park Road.

This scheme involves the widening of the southern footway to provide a shared footway/cycleway to allow active travel users to navigate along the corridor, between the section of Scheme 3 which adjoins Brierley Road (adj. to Regents Park Road) and Scheme E at Oakalls Roundabout. To facilitate the shared footway cycleway, the road is being narrowed on the southern side with verge areas installed between the carriageway and the active travel route.

A raised table is proposed across Green Park Road to improve the crossing for cyclist and pedestrians and crossing over Regents Park Road itself are retained and improved.
